SMIT R PATEL

SEM 5

SOFTWARE ENGINEERING

PRACTICAL 7

Aim: Demonstration of Source Code & Configuration Management using Git, Gitbash & GitHub.

Demo Task:

For demo project, commands and steps to perform various source code and config management activities using Git, Git bash and Github.

Task to be performed by Students:

Follow the below workflow for your project using SCM tools.

Make sure to add and get awareness for the following below tasks for your project/system assigned to you.

1. Managing your organization's GitHub account , Install Git

```
Windows PowerShell
PS C:\Users\SMIT\Desktop> mkdir se

Directory: C:\Users\SMIT\Desktop

Mode                LastWriteTime         Length Name
----                -
d-----          9/29/2021   1:37 PM             se

PS C:\Users\SMIT\Desktop> cd se
PS C:\Users\SMIT\Desktop\se> ls
PS C:\Users\SMIT\Desktop\se>
```

To initialize a git repository in the root of the folder, run the git init

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git init
Reinitialized existing Git repository in C:/Users/SMIT/Desktop/se/.git/
```

2. Create and adding new files to local git repository

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ touch Pr7_git.txt

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ ls
Pr7_git.txt  hello.txt  index.html  registration.html

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git status
On branch master
Your branch is up to date with 'origin/master'.

Untracked files:
  (use "git add <file>..." to include in what will be committed)
    Pr7_git.txt

nothing added to commit but untracked files present (use "git add" to track)

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ ll
total 8
-rw-r--r-- 1 SMIT 197121    0 Sep 29 12:36 Pr7_git.txt
-rw-r--r-- 1 SMIT 197121    0 Sep 29 12:29 hello.txt
-rw-r--r-- 1 SMIT 197121  657 Sep 22 11:03 index.html
-rw-r--r-- 1 SMIT 197121 2049 Sep 22 10:57 registration.html

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$
```

Here git has noticed that there is a new file called PR6_git.txt but unless we use “git add” command git will not do anything with it.

3. Demonstrate the staging environment and various commits

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ ll
total 8
-rw-r--r-- 1 SMIT 197121  657 Sep 22 11:03 index.html
-rw-r--r-- 1 SMIT 197121 2049 Sep 22 10:57 registration.html

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git commit -m "First commit"
[master (root-commit) 2541845] First commit
 2 files changed, 149 insertions(+)
 create mode 100644 index.html
 create mode 100644 registration.html

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git log
commit 25418457e698ddcfa9684e1fd45e2ee09d1f4131 (HEAD -> master)
Author: JayAmbeProgrammer <smitrpatel19@gnu.ac.in>
Date:   Wed Sep 29 09:56:53 2021 +0530

    First commit

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$
```

4. Add a file in to the staging environment

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git add pr7_git.txt

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git status
On branch master
nothing to commit, working tree clean

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$
```

After doing git add "filename" when we see the status of the file using git status command we can see that the file is in the staging area.

5. Create commit and new branches

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git commit -m "First commit"
On branch master
nothing to commit, working tree clean

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git status
On branch master
nothing to commit, working tree clean

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ .....
```

The file has been

committed.Now

creating new branch:-

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git branch
* master

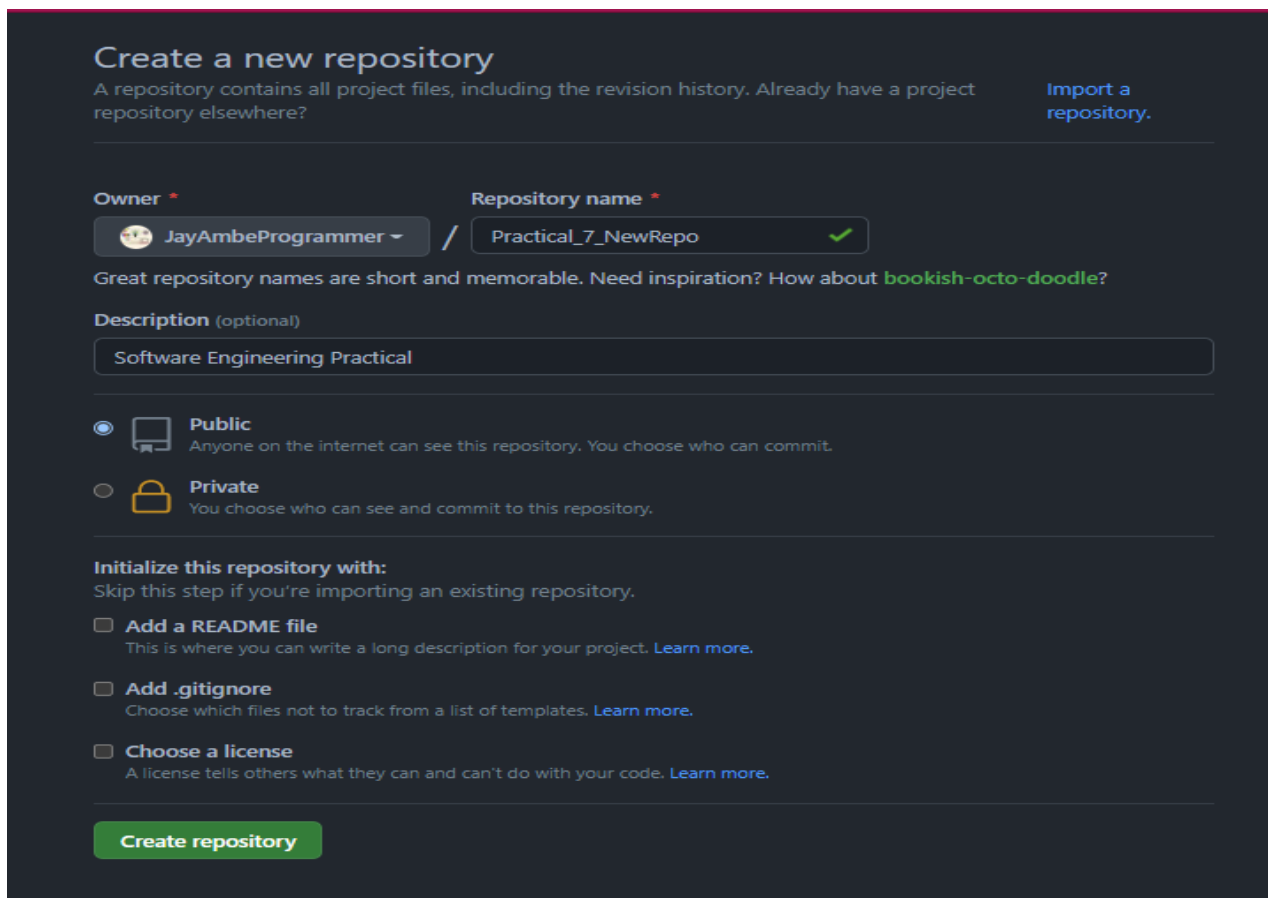

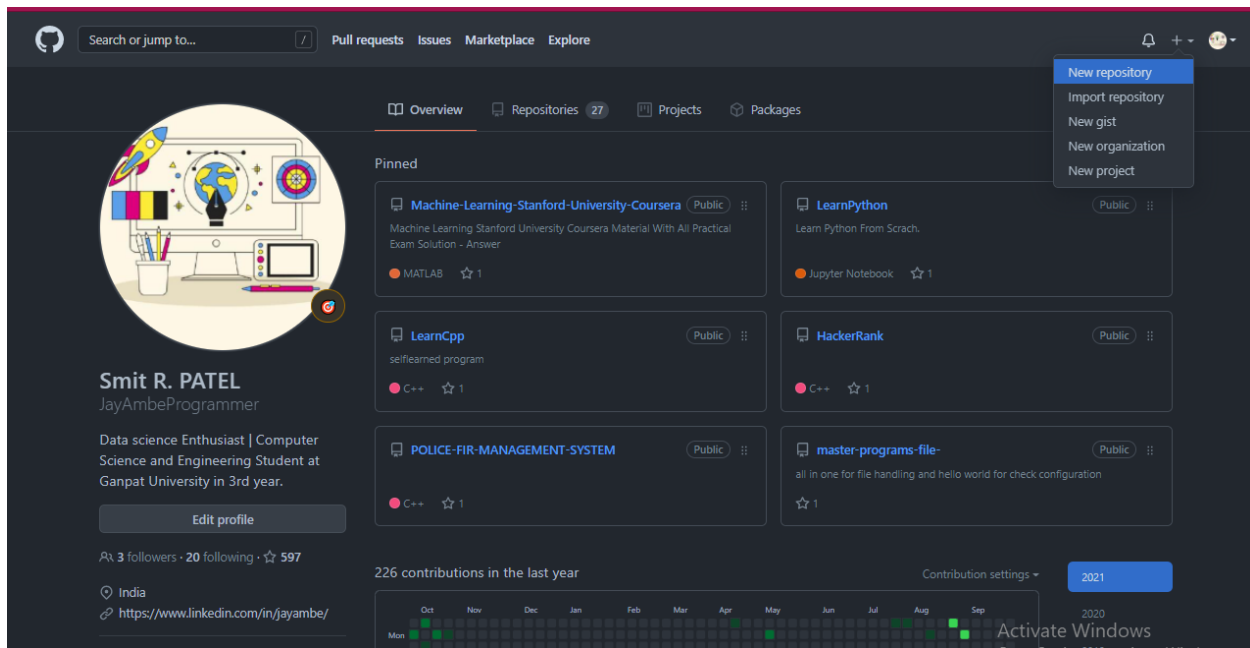

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git checkout -b newBranch
Switched to a new branch 'newBranch'

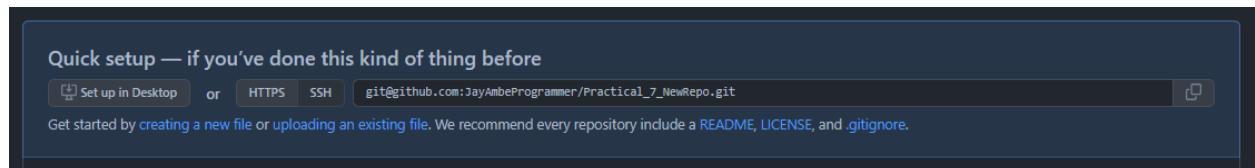

SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$ git branch
  master
* newBranch

SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$ .....
```

First there was only “master” branch but after using git checkout -b newBranch it will create a newbranch and will move us to the new branch.

6. Create a new repository on Github.

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$ git remote add origin https://github.com/JayAmbeProgrammer/Practical_7_NewRepo

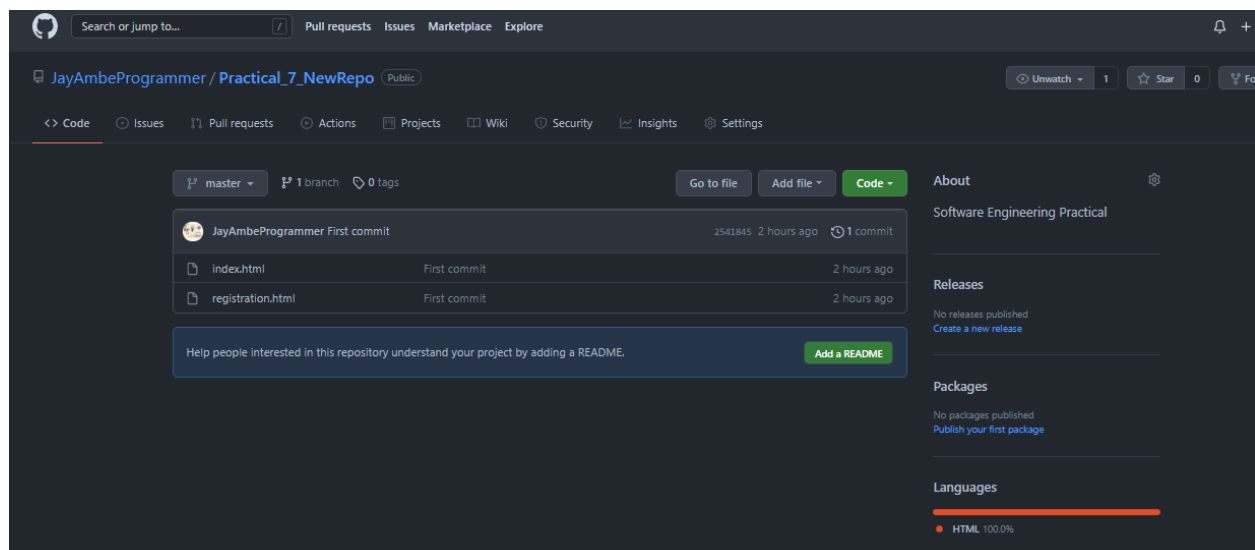

SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$ |
```

Added Git repository to local folder

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$ git push -u origin master
Enumerating objects: 4, done.
Counting objects: 100% (4/4), done.

Compressing objects: 100% (4/4), done.
Writing objects: 100% (4/4), 1.44 KiB | 367.00 KiB/s, done.
Total 4 (delta 0), reused 0 (delta 0), pack-reused 0
To https://github.com/JayAmbeProgrammer/Practical_7_NewRepo
 * [new branch]      master -> master
Branch 'master' set up to track remote branch 'master' from 'origin'.

SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$
```

Pushed file to git.

7. Pushing a branch to Github

MINGW64:/c/Users/SMIT/Desktop/se

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$ touch hello.txt

SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$ git add hello.txt

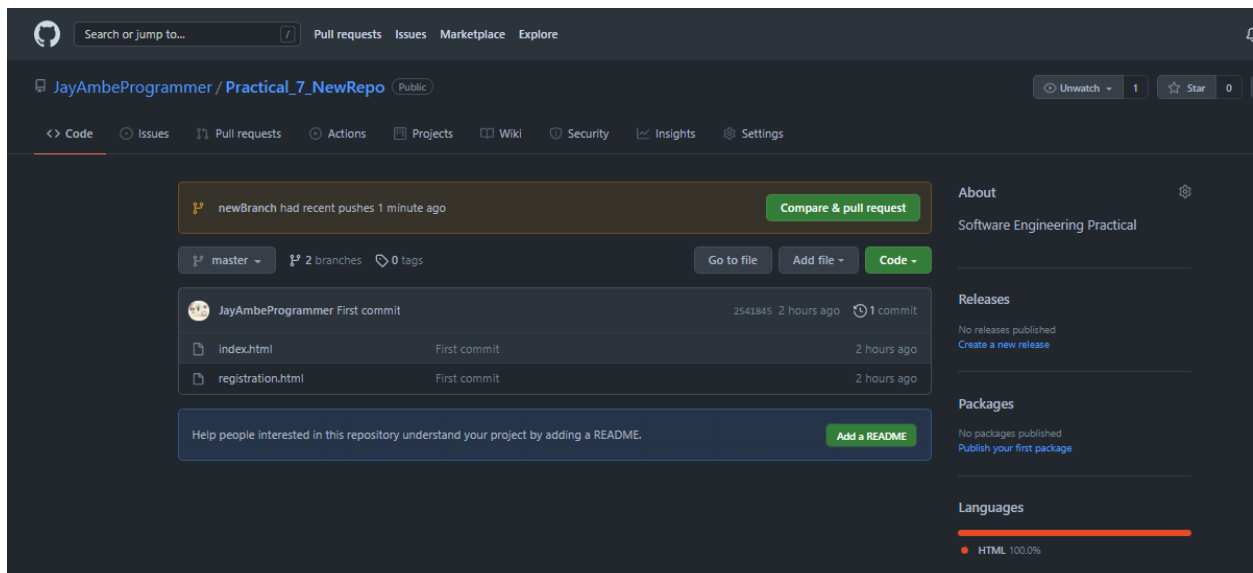

SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$ git commit -m "newBranch First Commit"
[newBranch 8990512] newBranch First Commit
1 file changed, 0 insertions(+), 0 deletions(-)
create mode 100644 hello.txt

SMIT@MacBook-Air MINGW64 ~/Desktop/se (newBranch)
$ git checkout master
Switched to branch 'master'
Your branch is up to date with 'origin/master'.

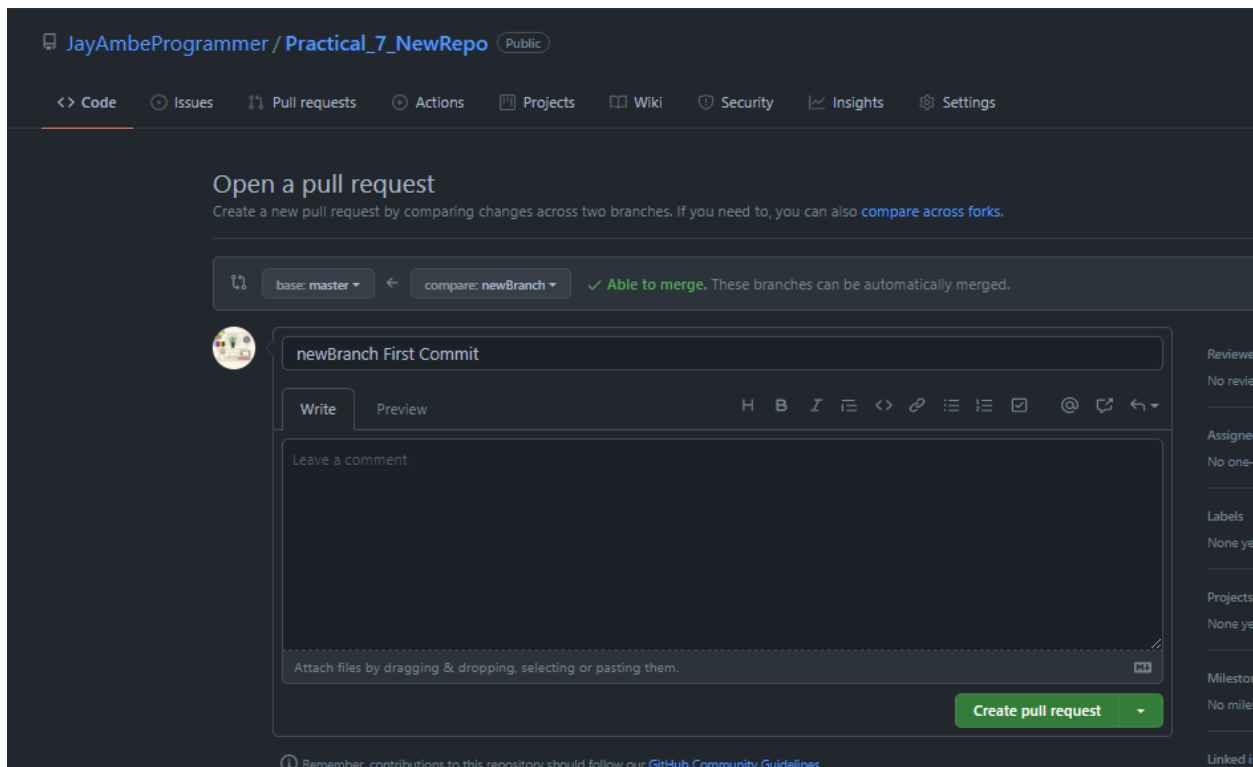

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ git push origin newBranch
Enumerating objects: 4, done.
Counting objects: 100% (4/4), done.
Delta compression using up to 4 threads
Compressing objects: 100% (2/2), done.
Writing objects: 100% (3/3), 335 bytes | 67.00 KiB/s, done.
Total 3 (delta 0), reused 0 (delta 0), pack-reused 0

remote: Create a pull request for 'newBranch' on GitHub by visiting:
remote:   https://github.com/JayAmbeProgrammer/Practical_7_NewRepo/pull/new/newBranch
remote:
To https://github.com/JayAmbeProgrammer/Practical_7_NewRepo
 * [new branch]      newBranch -> newBranch

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ |
```

Here I created and committed a new file in newBranch branch then from master branch I Pushed newBranch to github

Here there are difference in master branch and newBranch so after clicking “Compare and pull request” it will change the master branch.

8. Managing Pull Request for your projects (PRs)

The screenshot shows a GitHub Pull Request (PR) titled "newBranch First Commit #1". At the top, it indicates the PR is "Open" and that "JayAmbeProgram..." wants to merge 1 commit into the `master` branch from the `newBranch` branch. Below this, there are tabs for "Conversation" (0), "Commits" (1), "Checks" (0), and "Files changed" (1). A comment from "JayAmbeProgrammer" is visible, stating "No description provided." Below the comment, a commit titled "newBranch First Commit" is shown with a green checkmark and the commit hash "8990512". A message below the commit says "Add more commits by pushing to the `newBranch` branch on JayAmbeProgrammer/Practical_7_NewRepo." A green box contains two status messages: "All checks have passed" (1 successful check) and "This branch has no conflicts with the base branch" (Merging can be performed automatically). A green button labeled "Merge pull request" is present. At the bottom, there is a "Write" tab with a text area for comments and a "Comment" button. A "Close pull request" button is also visible.

The screenshot shows the same GitHub Pull Request (PR) titled "newBranch First Commit #1", but now it is in the "Merged" state. The top bar indicates "Merged" and that "JayAmbeProgram..." merged 1 commit into the `master` branch from the `newBranch` branch. The tabs for "Conversation" (0), "Commits" (1), "Checks" (0), and "Files changed" (1) remain. The comment from "JayAmbeProgrammer" is still visible. Below the comment, the commit "newBranch First Commit" is shown with a green checkmark and the commit hash "8990512". A new commit is shown below it, titled "JayAmbeProgrammer merged commit e07b605 into master now", with a green checkmark and the commit hash "e07b605". A green box contains a message: "Pull request successfully merged and closed. You're all set—the `newBranch` branch can be safely deleted." A green button labeled "Delete branch" is present. At the bottom, there is a "Write" tab with a text area for comments and a "Comment" button. A "Close pull request" button is also visible.

Date:   Wed Sep 29 12:19:54 2021 +0530

    newBranch First Commit

commit 25418457e698ddcfa9684e1fd45e2ee09d1f4131
Author: JayAmbeProgrammer <smitrpatel19@gnu.ac.in>
Date:   Wed Sep 29 09:56:53 2021 +0530

    First commit

SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$
```

Extra :-

Prerequisite :

1) check connection:

command :-

\$ ssh -T [git@github.com](https://github.com)

```
SMIT@MacBook-Air MINGW64 ~/.ssh (master)
$ ssh -T git@github.com
git@github.com: Permission denied (publickey).
```

2) \$ssh-keygen.exe

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ ssh-keygen.exe
Generating public/private rsa key pair.
Enter file in which to save the key (/c/Users/SMIT/.ssh/id_rsa):
/c/Users/SMIT/.ssh/id_rsa already exists.
Overwrite (y/n)? y
Enter passphrase (empty for no passphrase):
Enter same passphrase again:
Your identification has been saved in /c/Users/SMIT/.ssh/id_rsa
Your public key has been saved in /c/Users/SMIT/.ssh/id_rsa.pub
The key fingerprint is:
SHA256:WjBj1/Q2q/x9BRy9ojh74vtniWqwUd/yfGb+xs1lsoo SMIT@MacBook-Air
The key's randomart image is:
+---[RSA 3072]-----+
|      .      .      |
|      . o      . .  |
|     = o +    . . .  |
|    . = o o .o.    |
|      S + o . .    |
|     * + + . . +   |
|    . * o = .Bo    |
|     . = = *o+=    |
|    o+E.=o=oo      |
+-----[SHA256]-----+
```

3) \$cd "C:\Users\Admin\.ssh"

```
SMIT@MacBook-Air MINGW64 ~/Desktop/se (master)
$ cd "C:\Users\SMIT\.ssh"
```

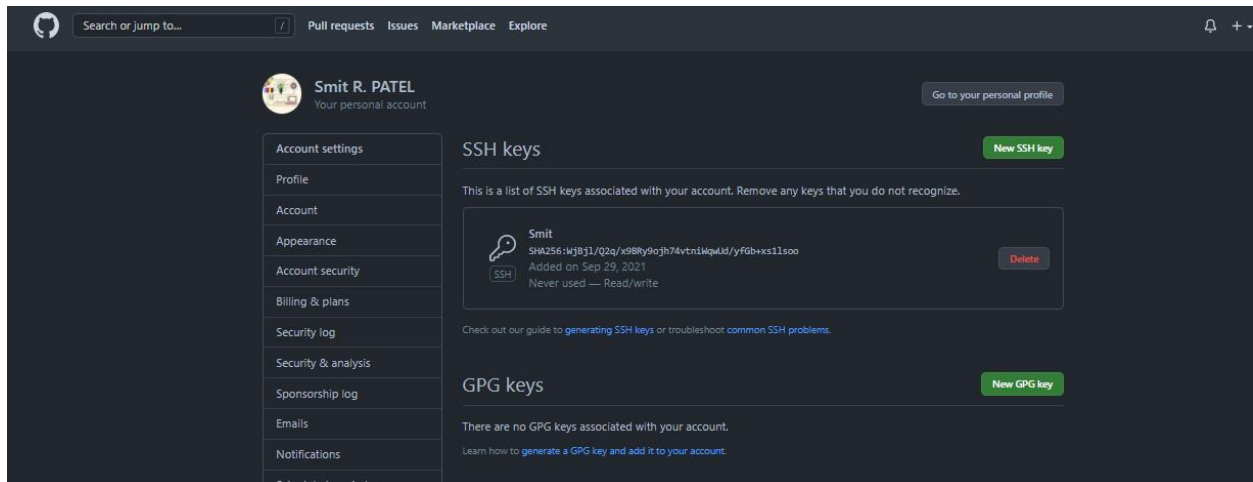

4) \$ls

```
SMIT@MacBook-Air MINGW64 ~/.ssh (master)
$ ls
id_rsa id_rsa.pub known_hosts known_hosts.old
```

5) \$cat id_rsa.pub

Note :- [Copy this public key & add to github-seeting -key : Paste the copied public key in ssh key and then add key.]

```
SMIT@MacBook-Air MINGW64 ~/.ssh (master)
$ cat id_rsa.pub

```

6) Check SST connection again using

```
$ssh -T git@github.com
```

```
SMIT@MacBook-Air MINGW64 ~/.ssh (master)
$ ssh -T git@github.com
Hi JayAmbeProgrammer! You've successfully authenticated, but GitHub does not provide shell access.
```

7)

```
$git config --global user.name "Smit"
```

```
$git config --global user.email "smitrpatel19@gnu.ac.in"
```

```
SMIT@MacBook-Air MINGW64 ~/.ssh (master)
$ git config --global user.name "Smit"

SMIT@MacBook-Air MINGW64 ~/.ssh (master)
$ git config --global user.email "smitrpatel19@gnu.ac.in"
```
